

Generative Infrastructure from Code

2024

Software Engineering Undergoing Seismic Shift

Challenges Balancing Dev Velocity vs. Platform Eng Governance at Scale

Alignment Requires Disruptive Technology

Infrastructure from Code

Mission

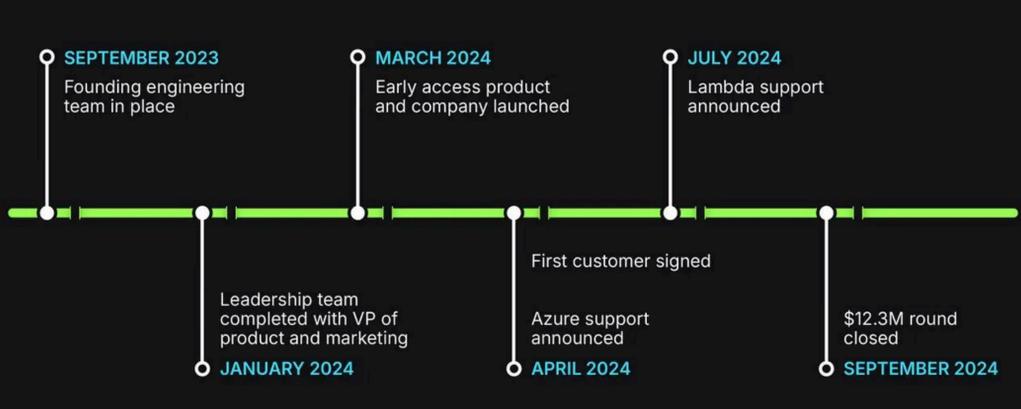

Remove the burden of infrastructure as code by auto-generating it from the application code with golden standards applied.

"Infrastructure from Code uses the application's code to figure out what infrastructure is required to successfully run the app. And because it uses the application as the foundation, it is automatically least privileged, correctly provisioned resources, and minimum viable infrastructure."
[What is Infrastructure from Code](#)

Vision

Enable any user to securely deploy applications to any clouds without delay by being application-centric, cloud-agnostic and developer-first.

Company Milestones

Founder & Leadership Team

 Sachin Aggarwal Co-founder and CEO <ul style="list-style-type: none"> Serial Entrepreneur and Company Builder DevOps, Cloud Native, Cybersecurity, leading large global organizations Accurics (sold to Tenable), Layered Insight (sold to Qualys) & Jvion (Sold to JMI Equity) 	 Asif Awan Co-founder and CPO <ul style="list-style-type: none"> Entrepreneur, build and technologist DevOps and cybersecurity expert, founding product lead Founder and CTO at Videspan, Layered Insight (sold to Qualys), Plusurna (sold to Aruba Networks)
 Arshad Sayyad Co-founder and CBO <ul style="list-style-type: none"> Expert in scaling organizations Board member, executive, investor experience Former President and Head - Fidelity Investments, Managing Director at Accenture 	 Danielle Cook VP of Marketing <ul style="list-style-type: none"> Cloud native marketing leader CNCF ambassador, author of CNCF Cloud Native Maturity Model Marketing leader at Fairwinds, ondat (sold to Akamai)
 Lauren Rother VP of Product <ul style="list-style-type: none"> Developer experience expert Founding Head of Product, Akita Software (sold to Postman) Product Manager - Terraform at HashiCorp 	 Kunal Dabir VP of Engineering - India <ul style="list-style-type: none"> Seasoned leader and developer productivity "geek" Speaker and Author Engineering leader at Medly, Vuclip, Thoughtworks
 Cesar Rodriguez VP of Engineering <ul style="list-style-type: none"> Cloud native engineering expert Built Terrascan, an open source static code analyzer for IaC
